

ADVANCE OF PIA

For my Integrative Product of Learning, I chose to program a little dynamic horoscope, you can choose to consult your horoscope of the day or another option.

First, you have to join your birthday date and the program will give you your zodiac sign by default. Then there will be three options you can choose:

1. The traditional horoscope of the day which tells you the predictions of some areas of your life depending on your zodiac sign (it only will be a predetermined horoscope, won't change depending on the day)
2. Know which is your compatibility with the other signs.
3. A questionnaire in which you will answer about your preferences and the program will show you what is the zodiacal sign you seem to be.
